

## Enozo: Case Study

### Andrew's Pizza and Skylight Movie Theater

#### Overview

Andrew's Pizza does not only have operate as a gourmet pizza parlor, but also a skylight movie theater. With Covid-19, They need to clean surfaces after each use quickly, but without the smell, cost and toxicity of bleach products. The increased attention to cleaning has raised concerns on the number of products used, the use of time and extra money, as well as the bleach products that weren't as safe on the different surfaces at the location i.e vinyl, food appliances, carpet, etc.

#### The Solution: Enozo

Using the Enozo, every surface at Andrew's Restaurant is cleaned in a safe and effective way. In between movies or after customers eat, floors, vinyl seats, and eating surfaces are all cleaned in 30 seconds, without damage. Andrew liked it so much, he now has two Enozo's.

*"It left the seats so clean that they use as there last wipe down on tables at night as well." -Ariadne*

*"It gives us a lot of peace of mind knowing that we can properly sanitize things during the pandemic" -Andrew*

## Results

Andrew's now has two Enozo's that have saved them time, money, and many products. The Enozo added a safety net for the company with the pandemic, as well as, gave Andrew's a sustainable and environmentally friendly option.

They usually charge them every night, however, it usually only needs to charge two times a week. What they really like about it The products super fast, its a one time purchase that only uses water. It's really cost-efficient for cleaning a fast paced environment.
